

# HOW TO TIE BELTS

**Find the center of your belt. Place the center of your belt across your waist and wrap it around yourself.**

**Cross the ends in the back keeping the end going around the left side tucked under the top piece. Bring both ends around to the front still keeping the end going around the left side tucked under the top.**

**Cross the right piece over and tuck it under both pieces.**

**Bring up and around. Cross that piece over the left.**

**Pull both ends to finish the knot and make it tight. Make sure the ends are even.**
